

Highest energy density large cell available in the market

- Rated voltage 3VDC
- 3400F capacitance
- Extreme energy density of 8.7Wh/kg
- High peak current, low ESR
- Excellent DC and cycle life
- High cycle life of 1 million cycles
- Durable and safe design
- Ideally suited for high energy demanding applications such as
  - UPS
  - Grid stabilization
  - Renewable energy storage

Millions of refills  
for infinite energy
