

- Rated voltage 144VDC
- 62.5F capacitance
- High peak current, ultra-low ESR
- Equipped with cooling provisions
- Vibration and shock proof
- IP69, intrinsically safe
- Integrated management and balancing via CAN
- Fixation to equipment according to customer request
- Ideally suited for mobile, heavy-duty cycling applications:
 - Hybridization of drivetrains for busses, trams as well as construction, mining and foresting vehicles
 - Power delivery and energy recuperation for cranes, straddle carriers, RTG cranes

Charge & discharge frequently & in SECONDS!

Immediate power on demand!
